2
Reproducible units
Hyperparams + Inputs + Outputs

Each run below corresponds to prediction or workflow execution. It documents tool identity, configuration and produced artifacts.

Runs

MofaExploration v0

#1 | App Prediction | MofaExploration | Status: FINISHED

Explore a trained MOFA/MOFA+ PBMC10K dataset model and export factors, weights, variance explained, and top features

Configuration

n_top_features
Number of top absolute-weight features to export per factor.
`20`

export_weights
Export the factor loadings matrix.
`1`

export_factors
Export the factor values matrix.
`1`

export_top_features
Export ranked top features per factor.
`1`

Inputs

Result

factors
Exported factor matrix (Z).
factors_3c21.csv
text/csv • 2122420 bytes
Download

weights
Exported weights/loadings matrix (W).
weights_df74.csv
text/csv • 449077 bytes
Download

top_features
Ranked top features per factor based on absolute weight.
top_features_1c22.csv
text/csv • 12930 bytes
Download

report
HTML summary report of the explored model.
