5
Reproducible units
Hyperparams + Inputs + Outputs

Each run below corresponds to prediction or workflow execution. It documents tool identity, configuration and produced artifacts.

Runs

MofaExploration v0

#1 | App Prediction | MofaExploration | Status: FINISHED

Explore a trained MOFA/MOFA+ PBMC10K dataset model and export factors, weights, variance explained, and top features

Configuration

n_top_features
Number of top absolute-weight features to export per factor.
5

export_weights
Export the factor loadings matrix.
1

export_factors
Export the factor values matrix.
1

export_top_features
Export ranked top features per factor.
1

Inputs

Result

factors
Exported factor matrix (Z).
factors_78ef.csv
text/csv • 2122420 bytes
Download

weights
Exported weights/loadings matrix (W).
weights_7d21.csv
text/csv • 449077 bytes
Download

top_features
Ranked top features per factor based on absolute weight.
top_features_4c6b.csv
text/csv • 3217 bytes
Download

report
HTML summary report of the explored model.

MofaExploration v0

#3 | App Prediction | MofaExploration | Status: FINISHED

Explore a trained MOFA/MOFA+ PBMC10K dataset model and export factors, weights, variance explained, and top features

Configuration

n_top_features
Number of top absolute-weight features to export per factor.
4

export_weights
Export the factor loadings matrix.
1

export_factors
Export the factor values matrix.
1

export_top_features
Export ranked top features per factor.
1

Inputs

Result

factors
Exported factor matrix (Z).

MofaExploration v0

#5 | App Prediction | MofaExploration | Status: FINISHED

Explore a trained MOFA/MOFA+ PBMC10K dataset model and export factors, weights, variance explained, and top features

Configuration

n_top_features
Number of top absolute-weight features to export per factor.
5

export_weights
Export the factor loadings matrix.
1

export_factors
Export the factor values matrix.
1

export_top_features
Export ranked top features per factor.
1

Inputs

Result

factors
Exported factor matrix (Z).

factors_a7a3.csv
text/csv • 2122420 bytes
Download

weights
Exported weights/loadings matrix (W).

weights_1491.csv
text/csv • 449077 bytes
Download

top_features
Ranked top features per factor based on absolute weight.

top_features_299f.csv
text/csv • 3217 bytes
Download

report
HTML summary report of the explored model.

<p>This app focuses on structured exports
for PoSyMed workflows. Notebook-style
plotting functions such as plot_weights,
plot_factors_scatter, and plot_r2 can be
added later as dedicated visual outputs.</p>
```

weights_plot

PNG heatmap of MOFA weights.
